What is the Regent College Digital Library?

- The Digital Library is a service dedicated to all Regent College students.
- Our aim is to provide access to a variety of quality digital resources in addition to the provision available via our partner institutions.
- The Digital Library is currently undergoing a development and growth stage, new resources will be added, and new services will be provided soon.
- The library is managed by a professional and dedicated librarian available to help and advise both staff and students.

Why use the Digital Library?

- All Digital Library resources are available to access 24/7.
- The information you find in our databases meets high academic standards, ensuring its reliability and relevance to your studies.
- The library catalogue allows you to search for information from a variety of databases, enabling you to access a wide range of materials.
- We provide full text access to eBooks and ejournal articles, giving you an opportunity to delve deeper into your research.
